THE BEST

dair restorative in the world is HALL's HARR RENTWER. It cores all diseases of the scaip, and stimulates the hair glands to healthful action. It stops the falling of the latt; provents its turning gray; cores taidness, and restores youthful color and freshness of appearance to heads already white with age. The following are a few flustrations of what is done by dair restorative in the world is HALL'S

HALL'S Vegetable Sicilian

HAIR RENEWER:

627 Mrs. Hunsmenny, 544 Franklin Act., Brooklyn, N. F., after a severe attack of Ery-eipelis in the head, famid her hair—already gray-falling of so rapidly that she soon became quite hald. One bottle of Hatt's Hara Rs. Nawen brought it back as soft, brown and tidek as when she was a girl.

thick as when she was a girl.

25 Mn. Kesling, as old farmer, near Waranc. Ind., had scarcely any hair left, and what
little there was of it had become nearly white.
One houtle of Hall's Hair Renewer stopped
its falling out, and gave him a thick, luxuriant
bed of hair, as brown and fresh as he ever had.

25 Mns. A. T. Wall, Greenfield, Charlers,
Eng., writes: "I have found the greatest beneft from the use of Hall's Hall Renewer, it
having restored my hair, which was rapily falling of, and returned its original color."

27 Dn. EMI, Sup. Defect. Med.

says: "One bottle of Hath's Hain RENEWER restored my hair to its natural, youthful color." No injurious substances enter into the composition of HALL'S HAIR RENEWER, and it is not a dye. It's vegetable ingredients render it in the highest degree benedients renter to this as a preventive of dis-ficial to the scaip as a preventive of dis-care. Its effects are natural and lasting, and it does not make the bair dry and ear.e. Its effects are natural and assembled and it does not make the hair dry and brashy, like the so-called restoratives compounded with alcohol.

Buckingham's Dye FOR THE WHISKERS

is, in four respects, superior to all others, 1st—It will produce a rich, natural color, brown or black, as desired. 2d—The color so produced is permanent, cannot be washed off, and will not soft anything with which it comes in contact.

3d—It is a single preparation, and more convenient of application than any other hair or whisker dye.

4th—It contains no deleterious ingredients, as do many preparations offered for like use. for like use.

IS THERE ANY HOPE NEW AND IMPORTANT OPINIONS A OF PULMONARY EXPERTS!

Can the Universal Consumption be Successfully Treated?

Dr. Borgeon, a leading French doctor, has a new treatment for consump ion.

He gives an enema of carbonic acid sulphpretted hydrogen gases, the latter

gas carrying the former into every part of the throat and lungs.

This treatment, too, is directed at effects—the cause remains undisturbed. What this caus eis has been stated by perhaps the highest pulmonary authority in the world, i. e., the Brompton Hos-pital for Consumptives, in London, Eng. This malady every year carries off from one-seventh to one-fifth of the entire population of England!

Dr. Payne, M.D., M.R.C.P., London, is sutherity for this statement.

The same or a greater proportion of deaths obtains in America.

Dr. Payne also says that one-half the total number of deaths from all other causes have seeds of this disease in the system which only require some irritant to develop!

Dr. Hermann Brehmer, an eminent German authority, says that consump-tion is caused by deficient nutrition of

the lungs, by poor blood.

These authorities cannot be disputed. The medical world recognizes them. The pric soid is the irritant in the blood that causes the development of the seeds which Dr. Brehmer says lie dormant in

the blood.

Every particle of blood which passes through the lungs and heart, also goes through the kidneys, and if they are in the least deranged they cannot rid the blood of its killing poison. The thousand little hair-like sewer tubes of the kidneys very easily get blocked up and diseased; and when they do, they corrupt instead of purifying the blood. Kidney disease may exist, and yet no pain occur in that organ, because it is deficient in nerves of sensation. the blood. sensation.

Dip your finger in acid every day and it soon festers and is destroyed. acid poisoned blood through the lungs

very second, and they soon give way. The Brompton Hospital investigation showed that 52 per cent, of the victims of consumption were afflicted with deranged kidneys, which permitted the uric acid poison to remain in the blood and irritate the lungs. This uric acid is always fighting every vital organ, and if there be any inherent weakness in the lungs it inevitably causes pneumonia,

cough and consumption.

The real cause of pulmonary troubles being so authoritatively shown to be faulty even though unsuspected action of the kidneys, explains why, in order to master the dreaded consumption, one must rid the blood of the unic acid irritant which inflames and burns up the lung substance. For this purpose there is nothing equal to that great specific, Warner's safe cure. This remedy has now the favor of medical men all over nothing equal to that great specific, the world purely on its merits. We have no doubt that if the kidneys are kept in natural action, consumption and a great many other diseases, caused by uric acid, will not only be cured but will be pre-

When the kidney is healthy, no albumen appears in the water, but albumen is found in the water of more than balf of those who die of consumption!

of those who die of consumption!

This, then, is the condition of things that always precedes consumption:

First, weakened kidneys; second, retained uric acid, poisoning the blood; third, the development of disease in the lungs by the irritant acids passing through them. Then there is a little cough in the morning; soon thick, yellow matter is spit up, followed by loss of fesh and strength, with dreadful nightsweats; and when the patient goes to his cod-liver oil which his stomach, weakened also by uric acid in the blood, can-not digest. Because there is no pain not digest. Because there is no pain present in the kidneys, the patient does not think they are affected, but the kidney acid is doing its work every minute, every hour, day and night, and by-and-by the disease of the lungs has advanced until pus is developed, then come hemorrhages, and at last the glassy stare which denotes that the end is near!

A post-mortem examination of such shows that the terrible uric acid has completely destroyed the substance of the lung.
It is impossible to cure lung disease

when the blood is poisoned with uric

Dissolution Notice.

Know all men by these presents, that the partnership heretofore existing between the undersigned is hereby dissolved by mutual consent.
